trust in performance**

## Company Profile

**TOLY WOOD Bahrain** Decor Construction is passionate in construction. We believe that being a builder execute a high standard and satisfaction services. We are here to advocate respect of our trade and deliver a high-quality product with a minimum fuss.

Managers at Decor Construction are well-experienced within the Gibraltar and Spanish construction business. We have developed close relationships with the most excellent design allies and subcontractors in every market. Decor Construction provides a hassle-free integrated service and operational approach to every aspect of the project, from pre-construction across the delivery of keys.

Our workforce is trained to work at its best in meeting the highest standards as possible and to comply with the latest building regulations, satisfactorily meeting the client's requirements. We believe that skilled and qualified workers are the key to success. As we conclude that our people signifies the difference.

## Our Mission

TOLY WOOD Bahrain at Decor Construction has always been our philosophy to create partnerships with our clients. We work with building owners and managers through various services that help our clients control their costs while getting the most value from their building.

When people ask about us, we always maintain that our most valuable asset are the people who make up our company. Our team consists of diverse, highly trained individuals who are dedicated to provide excellent workmanship.

## Our History

**TOLY WOOD Bahrain** They are the reason why we are one of the best construction companies. At Decor Construction we value long term client relationships. We don't need to advertise extensively because our business comes from the referrals of our client's satisfaction. We establish assurance of agreement and follow-ups with our clients to maintain undeniable trust.

We pursue to continue to be the best and number one construction company for many years to come. When people talk about us we want our commitment of quality service to be what they remember. From residential construction to commercial construction, we always provide the highest quality workmanship available.

# **Our Targets**

## Stainless Steel and Mild Steel

Steel is one of the most common materials in the world, representing an industry that produces 1.3 billion tons a year, and it is a material used throughout the construction of many architectural fabrications. There are many sub-categories of steel and depending on the various qualities and characteristics of a build the choice of steel selected may vary. The properties that vary the most between steel types are strength, ductility, hardness, aesthetics, and cost. Depending on your scope of work, selecting the proper steel type for the job can benefit the quality of the project and cost.

**Stainless steel:** It is defined as a steel alloy with a minimum of 11.5 wt% chromium content. Stainless steel does not stain, corrode or rust as easily as ordinary steel (it “stains less”), but it is not stain-proof. It is also called corrosion resistant steel when the alloy type and grade are not detailed, particularly in the aviation industry.

**Mild steels:** Carbon steel is sometimes referred to as ‘mild steel’ or ‘plain carbon steel’. The American Iron and Steel Institute defines a carbon steel as having no more than 2 % carbon and no other appreciable alloying element. Carbon steel makes up the largest part of steel production and is used in a vast range of applications. Typically carbon steels are stiff and strong. They also exhibit ferromagnetism (i.e. they are magnetic).

## Metal Fabrication

The Engineering Division has acquired wide experience in heavy fabrication and associated manufacturing activities connected with aluminum smelter refineries & other major companies in BAHRAIN and around the Gulf.

Our facility has been accredited to ISO 9002 by DNV. Every activity affecting the quality of company's products is controlled by documented procedures to ensure that the customer requirements are satisfied. BAHRAIN WORKSHOP COMPANY is a well-established and reputable company offering a superbly equipped facility and a diverse range of services such as:

- Fabrication & Welding
- Precision Machining
- Foundry (Casting)
- Blasting & Painting
- Galvanizing
- Rotating Equipment's Division
- Site Operations

The Engineering Division was further diversified with the addition of CNC wire cut and CNC milling machine forming Die Division. The Die Division concentrates on the manufacture of extrusion Dies used in the aluminum industry. In conjunction, a foundry is currently functioning with an induction furnace with high capacity.

Our manufacturing facilities include 150,000-sq. ft. covered area, which houses the Machine shop, heavy fabrication shop and light fabrication shop. EOT cranes varying from five tons to twenty tons lifting capacity cover the entire production area.

## CNC & Spray Painting

Well equipped with latest modern machineries such as Wire-cut, EDM, CNC, Milling, CNC Lathe and technical know-how accumulated. Applying newest CAD/CAM, we ensure that we can supply optimal products through our quality assurance system.

Design & Drawings: Computerized designs services are provided in all major disciplines. Area in which work is carried out includes system design, process design, equipment specifications, detailed electro-mechanical design, plant layout, and piping design, electrical & instrumentation.

## Interior Fit Out Contracting

TOLY WOOD, one of the leading interior fit-out contractor in the kingdom of Bahrain with many projects to showcase its ability and skillset. Indeed, since its inception, the company has been undertaking many prestigious Interior fit out contracts for major retailers from around the globe.

Our history is one of innovation – one marked by creative approaches, as well as the development of increasingly sophisticated systems, reflecting a unique blend of technical expertise technologies.

We have crafted more than 100 outlets in Bahrain City Center alone, and many in the other shopping centers in the country.

Superior responsiveness to customer needs is another al Riyadh technical services hallmark, the engineers and support staffs take special pride in their ability to serve clients in an efficient, individualized and effective manner.

## JOINERY

Alternative energy is often measured as: any energy source that is an alternative to fossil fuel. These alternatives are intended to address concerns about such fossil fuels. It causes less pollution also.

The nature of what constitutes an alternative energy source has changed considerably over time, as have controversies regarding energy use. Today, because of the variety of energy choices and differing goals of their advocates, defining some energy types as “alternative” is highly controversial.

In a general sense, alternative energy as it is currently conceived, is that which is produced or recovered without the undesirable consequences inherent in fossil fuel use, particularly high carbon dioxide emissions (greenhouse gas), an important factor in global warming.

While many renewable energy projects are large-scale, renewable technologies are also suited to rural and remote areas and developing countries, where energy is often crucial in human development. United Nations' Secretary-General Ban Ki-moon has said that renewable energy has the ability to lift the poorest nations to new levels of prosperity.

## Corian Solid Surface

For over 200 years duPont has pushed the boundaries of industry, inventing new materials and techniques and opening up new applications and solutions. This track record of successful invention has made a major contribution, both functionally and aesthetically, to global markets, projects and end-user products.

Corian high-tech surface beautifully exemplifies this capability. Created to offer a higher performance alternative to conventional surfacing materials, it is now internationally recognised for its value to the world of design and architecture. Corian is renowned for exceptional versatility, beauty and almost limitless applications for residential, public and commercial environments, both indoor and outdoor. From kitchens to lighting, home automation systems to touch control surfaces, bathrooms to the skin of buildings and furnishing and fashion accessories: the “alchemy” of Corian can be found in an extensive and expanding range of everyday products, systems and designs. Corian embodies the spirit of endless evolution, built on world-class expertise in science, technology and marketing and an enviable heritage of genuine innovation.

## Internal Decoration

For Clients who want us to remain actively involved throughout the design project we offer a Full service interior design. We will work with you to develop a design program; research building codes; choose/secure furnishings, color, appliances, fixtures, lighting, window treatment and accessories; assist you in choosing a contractor; and develop and manage budgets and schedules.
